

## Annual bill reminder

In February, bills were issued to well owners with outstanding balances for the 2015 billing cycle. As a reminder, electronic payments made through your bank must include your GMP number, which can be found on the upper left corner of the bill.

GMP fees fund a variety of programs for well users, including financial assistance programs for well caps and sub-meters, as well as conservation rebates. Learn more about these programs at [LasVegasGMP.org](http://LasVegasGMP.org).

*Groundwater Update* is published by the Southern Nevada Water Authority (SNWA). Comments or questions should be directed to:

## The GMP works for you!

Since it began in 1997, the Groundwater Management Program (GMP) has been a valuable resource for well users by offering financial assistance and conservation programs.

For instance, if you are interested in connecting to a municipal water system, the GMP's Well Conversion Grant Program can help. More than 500 homes and businesses have participated in this program, which helps reduce the costs associated with connecting to municipal water. When well users connect to municipal water, it reduces demands on the valley's aquifer.

The GMP also offers a \$2 rebate per square-foot (up to 5,000 square feet) of turf you remove and replace with water-efficient landscaping. Local well users have successfully converted more than 1.8 million square feet of turf, further reducing demands on the Las Vegas aquifer through conservation efforts.

Find additional information about the GMP's financial assistance programs at [LasVegasGMP.org](http://LasVegasGMP.org) or call the Groundwater Information Helpline at **(702) 258-7288**.

## Save water outdoors

Manage your outdoor water use and stay within the limits of your water-use permit with these tips:

- Upgrade to a Water Smart Landscape and save an average of 55 gallons of water annually per square foot of grass replaced with water-efficient landscaping.
- Take Sundays off this summer and reduce your water use by 10-15 percent. Landscapes can stay healthy and look great with less.
- Test, adjust and repair your sprinkler heads and drip emitters regularly for broken or missing parts

Find more water-smart tips at [snwa.com](http://snwa.com).

# Attend annual groundwater public workshop

Learn more about groundwater in the Las Vegas Valley at the Groundwater Management Program annual public workshop on Tuesday, **July 12** at 6 p.m. The workshop will be held at the Las Vegas Valley Water District offices at 1001 S. Valley View Boulevard.

Representatives from the Nevada Division of Water Resources, Southern Nevada Health District, Nevada Division of Environmental Protection and Southern Nevada Water Authority will be present to answer questions about water conservation, health and water quality, and other topics of interest.

During the open house, visit several information booths and ask questions concerning the groundwater basin or your individual well. Find out more information about the upcoming workshop by contacting Natalia Londono-Arroyo at (702) **258-2416**.

## DID YOU KNOW

You can learn about water levels in the valley and water level fluctuations near your well through the GMP Hydrologic Telemetry System. Visit [LasVegasGMP.org](http://LasVegasGMP.org) for details.
